Address: Muslim Town, Lahore

PERSONAL PROFILE

Final-year Computer Science student passionate about ML/AI, building intelligent systems and data-driven solutions. Seeking opportunities to apply skills, learn, and contribute to impactful real-world innovations.

EDUCATION

University of Central Punjab, Lahore Oct 2022 - Present
BS Computer Science (Final Year 8th Sem) **Major:** Software Development **Minor:** ML-AI & Quality Assurance

TECH-PROJECTS

INFITRON – AI-Based Smart Wardrobe & Outfit Recommendation System

Python, Kotlin, Firebase, TensorFlow, PyTorch, ARCore, MediaPipe | Final Year Project - *In Progress*

- Building a cross-platform app for intelligent wardrobe management with AI-based clothing classification and automatic tagging. Developing a Reinforcement Learning-based recommendation engine incorporating weather, calendar, and user preference context. Integrating ARCore + MediaPipe for virtual try-on; designed full system architecture (ERD, UML, DFD, sequence diagrams).

Heart Disease Classification & Model Comparison *Python, Scikit-learn, Pandas*

- Developed an ML pipeline with PCA and compared models (Logistic Regression, KNN, SVM, Decision Tree, Random Forest, ANN) using metrics like Accuracy, Precision, Recall, and ROC-AUC.

Toxic Comment Classification System *Python, TF-IDF, Random Forest, Gradio*

- Developed an NLP classifier using TF-IDF vectorization and Random Forest with a Gradio interface for real-time predictions; evaluated with Accuracy, F1-score, and ROC-AUC.

House Price Prediction System *Python, Scikit-learn*

- Developed a regression model with data preprocessing and feature engineering; evaluated using standard regression metrics

Truck Dispatching Mobile App *Kotlin, Android Studio*

- Built a logistics management app for delivery assignment and real-time tracking with intuitive UI design

SKILLS AND INTERESTS

Programming Languages: C, C++, Python, Java, Kotlin

AI/Machine Learning: TensorFlow, PyTorch, Scikit-learn, Pandas, MediaPipe, TF-IDF, Reinforcement Learning, NLP

Mobile & Backend: Android Studio, Firebase, ARCore, REST APIs

Tools & Technologies: Git & GitHub, Gradio, Jupyter Notebook, Google Colab, VS Code, Android Studio

Interpersonal Skills: Proficient in Microsoft Applications, Problem solving, Willingness to learn more

CERTIFICATIONS

- AWS Academy Cloud Foundations - Amazon Web Services
